DETAILED ACTION

1. Claims 1, 3-6, 8-16 are pending in the application.
2. Claims 2 & 7 have been canceled.

Allowable Subject Matter

3. Claims 1, 3-6, 8-16 and re-numbered as claims 1-to14 respectively are allowed.
4. Claims 1, 3-6, 8-16 and re-numbered as claims 1-to14 respectively are allowable over the prior art of record because the cited references do not contain the specified limitation of a signal path selector for selectively providing a desired electric signal path or paths between a plurality of input means such as input terminals and a plurality of output means such as output terminals, comprising:
(a) a plurality of input means; (b) a plurality of output means; (c) input select means capable of manual actuation for selecting any of the input means for creation of a signal path to any selected output means; (d) output select means capable of manual actuation for selecting any of the output means for creation of a signal path from any selected input means; (e) control means responsive to the actuation of the input select means and the output select means for creating the desired signal path between any selected input means and any selected output means to the exclusion of any preexisting signal path between the input means and the output means that might interfere with the creation of the desired signal path, the control means comprising: (1) means for storing data indicative of whether or not the individual input means and the individual output means are selected by the input select means and the output select means at a current

sampling moment; (2) means for storing data indicative of whether or not the individual input means and the individual output means were selected by the input select means and the output select means at a previous sampling moment; and (3) means for comparing at each sampling moment, the data stored at the current and the previous sampling moments in order to determine whether any of the input means and any of the output means are selected for creation of a signal path therebetween.
